

Manning & Napier Fund, Inc. 01/01/2025 - 12/31/2025 Distributions

Shareholders will not experience a loss from a distribution. When a distribution is paid, the fund's net asset value (NAV) is reduced by the per-share amount of the distribution. Shareholders who choose to reinvest their distributions will automatically purchase additional shares. This results in the total market value of their investment remaining the same, but the number of shares they own increasing.

This document reflects certain revised figures for the Callodine Equity Income Series, as indicated below. Shareholders are requested to review these updates carefully and to disregard all prior versions of this document.

CUSIP #	Fund Name	Record Date	Ex/Reinvest Date	Pay Date	Ordinary Income	Short-Term Cap Gain Rate	Long-Term Cap Gain Rate	Total Cap Gain Rate	NAV	Distribution Yield

*** Revised figure**

Past distributions are not indicative of future distributions. Additional distribution history is available upon request.

Distribution yield is a backward-looking, point-in-time metric that captures the income distributed over the stated period as a percentage of the investment's value. Dividends are paid by corporations directly to their shareholders and are derived from the company's profits. In contrast, distributions are made by entities such as mutual funds. Distribution yields stated here encompass income only, exclude capital gains and returns of capital, and are not based on trailing twelve-month distributions.
